

June 29, 2021

To Our Valued Customers,

Continued force majeure and allocation procedures in the resin market compounded with strengthening demand and inflationary costs have forced Berry Global's raw material suppliers to implement additional price increases. This includes an unprecedented price increase in plasticizers used in the manufacturer of PVC films and other PVC products.

As we fully expect the market to find balance at some point, we do not see neither resin nor its associated additives rebounding back to pre-pandemic levels. As a result of these increases, Berry will raise prices on PVC Overwrap films including cutter boxes, perforated films, meat wrap, converter and laundry films by 7% effective with orders placed on or after July 26, 2021 and calling for immediate shipment. Berry Global reserves the right to limit the size of orders to historical quantities to better serve the anticipated demand of our customers.

Berry Global will work closely with you to manage the impact of these price adjustments and keep you abreast of changing market conditions. Your local sales professional is always available to answer any questions you may have.

Thank you for your business and continued support.

Sincerely,

A handwritten signature in blue ink, appearing to read "Roland Castellanos".
