

January 14th, 2021

Dear Valued Customer,

We have attempted to absorb and delay this announcement for as long as possible. Fineline has experienced increases of over 200% in ocean freight and more than 50% increased costs in domestic freight combined with raw material increases. Due to the severity of the increases related to freight and raw materials we are forced to implement an 11% price increase effective February 15th, 2021. For direct container orders the pricing will be increased effective immediately.

Orders placed by February 12th for immediate shipment will be invoiced at current pricing. All orders outside regular order patterns are subject to review.

PODs and contract business will be updated per the terms of the agreement.

Please contact your Fineline sales representative if you have any questions.

Thank you for your continued partnership. We Value and Appreciate your business!

Sincerely,

Abraham Feig
CEO
