April 30, 2026

Price Increase Notification, Effective June 1, 2026

Valued Customers and Stakeholders,

We appreciate your continued partnership and trust you place in NCCO.

Over the past several years, we continue to experience sustained cost increases across key areas of our business, including raw materials, packaging, and transportation. While we have worked to offset these pressures through operational efficiencies, supplier partnerships, and internal cost controls, these costs remain elevated.

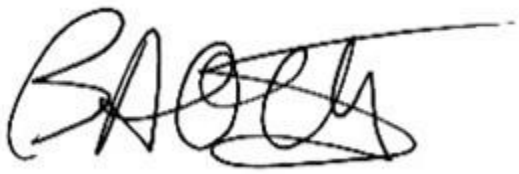

To continue delivering the quality, service, and industry-leading fill rates you expect for our products, we will be implementing a price adjustment effective June 1, 2026. This increase will average approximately 10% across our portfolio.

As a courtesy, updated price lists will be shared at least 30 days in advance or per contractual agreements. Your NCCO representative is available to review specific items and answer any questions.

NCCO remains committed to supporting your business and delivering consistent value.

Sincerely,

John N. Rodriguez
NCCO FS President, COO
